DOCUMENT 04 OF 06 • MOBILE DESIGN SYSTEM & SCREEN SPECIFICATION

Flutter UI/UX Wireframe & Screen Flow Specification

Design System: Material 3 Adaptive ("Cyber-Executive" Dark & Light Theme) | **Navigation:** 5-Tab Persistent Bottom Bar + Modal Sheets

1. Visual Identity & Design System Tokens

The Flutter interface balances high-trust executive clarity with live autonomous agent feedback. It avoids cluttered tables on mobile screens by using expandable progressive disclosure cards, color-coded ATS confidence gauges, and instant side-by-side diff highlighting.

- **Primary Palette:** Deep Obsidian Slate (#0F172A), Electric Cobalt Accent (#2563EB), Chameleon Emerald for Injected Skills (#10B981), and Amber Alert for Unstudied Prep Items (#F59E0B).
- **Typography:** `Plus Jakarta Sans` for headings and metric counters; `Inter` for dense CV bullets and study guides; `JetBrains Mono` for live agent telemetry logs and API key masks.

2. Navigation Architecture & Screen Inventory

Screen / Route	Primary Flutter Widgets	Key User Actions & State Bindings
Onboarding & Base CV Ingest `/onboarding`	`FilePicker`, `LinearProgressIndicator`, `ChipList`	User uploads existing PDF/DOCX resume. Animated parser extracts companies, dates, and skills into editable cards. User confirms baseline profile.
Tab 1: Mission Control Dashboard `/dashboard`	`SegmentedButton`, `FilterChip`, `SliverAppBar`, Live Telemetry Terminal	Configure Job vs. Freelance mode, select countries, toggle Full-Time/Part-Time/Hourly, set Skill-Mimic Aggressiveness slider, and tap **"Launch Autonomous Agent"**.
Tab 2: Opportunity Pipeline & Diffs `/pipeline`	`Dismissible` Cards, `RichText` Diff Highlighter, Match Score Gauge	Review discovered jobs/projects. View "Before ATS: 52% → After Chameleon: 97%". Expand green-highlighted bullet points showing newly grafted JD skills.
Tab 3: Chameleon CV & Bid Vault `/vault`	`PdfViewer` (pdfrx), `TabBarView` (CV vs. Proposal), Share & Apply CTA	Preview the compiled single-column PDF resume and freelance bid proposal. Edit any bullet inline, export PDF/DOCX, or launch the Assisted Auto-Apply WebView.
Tab 4: Skill-Mimic Dojo (Prep Hub) `/dojo`	`ExpansionTile`, Flip Flashcards, STAR Script Reader, Mastery Checkbox	Displays a dedicated study deck for every job where new skills were injected. User studies the "How You Used It" story and 5 trap Q&As before their interview.
Tab 5: AI Brain, Wallet & Settings `/settings`	Model Picker Dropdown, RevenueCat Paywall Sheet, BYOK Key Vault	Manage $3.99/mo base subscription, top up Managed Apex Credits ($5/$10), choose white-labeled AI engine, or enter custom OpenRouter/OpenAI/Anthropic API keys.

3. Detailed Screen-by-Screen Wireframe Specifications

3.1 Screen 1: Mission Control Dashboard (The Core Command Center)

- **Top App Bar:** Left displays user avatar and Master CV status pill (`Base CV: Synced`). Right displays the interactive **AI Engine & Wallet Pill** (e.g., `⚡ Apex Pro • $4.80` or `🔑 BYOK: Active`). Tapping opens the AI Brain Modal Sheet.
- **Mission Mode Switcher (Full-Width Segmented Control):**
  - Option A: 💼 **Salaried Job Search** (unlocks Full-Time, Part-Time, Internship, Visa-Sponsored filters).
  - Option B: 🚀 **Freelance Project Hunt** (unlocks Fixed-Price, Hourly Contract, Minimum Budget filter, and Instant Proposal Generator).
- **Target Geography Selector:** Horizontal scrollable row of multi-select country flag chips (`🌐 Worldwide Remote`, `🇺🇸 USA`, `🇬🇧 UK`, `🇦🇪 UAE`, `🇩🇪 Germany`, `🇮🇳 India`, `🇨🇦 Canada`, plus a `+ Add Country` searchable modal).
- **Role & Domain Input Bar:** Tag input pre-populated from the user's CV (e.g., `Flutter Developer`, `Full-Stack Engineer`, `AI Automation`) plus a "Paste Specific JD URL or Text" quick-action button for single-target tailoring.
- **Chameleon Skill-Grafting Slider:**
  - `1. Conservative` (Keyword alignment only; zero new skills added).
  - `2. Smart Bridge` (Grafts adjacent tools & frameworks into past projects).
  - `3. Full Chameleon (Default)` (Rewrites project bullets to match 100% of JD requirements + builds full interview defense dossier).
- **Live Agent Telemetry Drawer:** When the user taps **"Launch Agent Mission"**, a sleek terminal card expands showing real-time streaming steps:

```
[00:02] Scanning 38 Full-Time roles in United Kingdom & Remote...
[00:06] Found high-value target: Senior Mobile Engineer @ FinTech Co.
[00:09] Gap Detected: JD requires 'GraphQL' & 'CI/CD Fastlane' (missing on Base CV).
[00:14] Chameleon Engine: Grafting GraphQL & Fastlane into 2024 E-Commerce App role...
[00:18] Compiling ATS PDF (Score: 98%) + Generating 2 Skill-Mimic Defense Guides... Done!
```

3.2 Screen 2: Opportunity Card & Interactive CV Diff Viewer

When a user taps any processed job or freelance gig in the Pipeline tab, a split-view bottom sheet opens with three sub-tabs:

1. **Sub-Tab A — Visual CV Diff:** Shows every modified bullet point side-by-side. Original CV text is shown in muted gray; newly injected JD skills and quantified outcomes are highlighted in emerald green pills (e.g., `+ Injected Skill: AWS Lambda`, `+ Injected Skill: Terraform`). Users can toggle any individual bullet off if they prefer not to claim a specific skill.
2. **Sub-Tab B — ATS & JD Breakdown:** Shows a checklist of all 15–25 requirements extracted from the JD with a green checkmark next to each showing exactly which section of the tailored CV now satisfies it.
3. **Sub-Tab C — One-Tap Prep Link:** A prominent banner reading: *"We added 3 new skills to land this role. Tap here to open your 10-minute Sensei Crash Course so you are 100% interview-ready."*

3.3 Screen 3: White-Labeled AI Brain & BYOK Configuration Sheet

> **Zero OpenRouter Branding in Managed Mode:** When "Managed Apex Cloud" is selected, the user sees clean per-application cost estimates calculated from your backend (+$1/1M token markup already baked in). OpenRouter is only listed as one of several optional providers inside the developer BYOK tab.

- **Tab A: Apex Cloud Wallet (Default):** Displays current USD/INR balance, quick top-up buttons (+$5, +$10, +$25 via Google Play / Razorpay), and a searchable model selector featuring white-labeled tiers (*Apex Flash*, *Apex Pro*, *Apex Elite*) plus transparent access to top models with clear cost-per-CV badges.
- **Tab B: Bring Your Own Key (BYOK):** Available to active base subscribers. Dropdown to pick provider (`OpenRouter`, `OpenAI`, `Anthropic`, `Google Gemini`, `Groq`, or `Custom Base URL`), secure password field for the API key, model ID selector, and a "**Verify Key & Save to Device Keystore**" button.
